My name is Alisson Fogaça and I live in Madrid, Spain. My educational background consists of a Bachelor's Degree in Computer Science, Graduate Degree in Technologies for Web Applications and a degree in Computer Education. I have been working with software tests for about 13 years, having experience in: Software quality assurance for REST API (backend) and web/desktop applications (frontend) in betting, gambling, accounting, finance and real estate; Functional, non-functional, technical, acceptance, reliability, system, integration, usability, regression, security and performance tests; Tests automation development for REST API with Java, Spring, REST Assured, Supertest and Cucumber; Tests automation development for web applications with JavaScript, Cypress and Cucumber; Utilization of agile methodologies such as Scrum and Kanban, and platforms like Jira, Zephyr, Jenkins, Elastic, Couchbase, Kafka, AWS and Git; Web application development with PHP, JavaScript, jQuery, CSS, HTML and MySQL database; I worked as a lead and computer teacher. I have a confident and committed professional profile, besides, experience in working with goals and deadlines. I strive to push myself out of my comfort zone; I'm always improving and learning through new challenges and studies.
