📄 <https://fogaca.net>

My name is Alisson Fogaça, and I currently live in Madrid, Spain. I hold a Bachelor's Degree in Computer Science, a Graduate Degree in Technologies for Web Applications, and a Degree in Computer Education. I've been working with software testing for over 13 years, focusing on both manual and automated testing for REST APIs and web/desktop applications across industries such as betting, gambling, accounting, finance, and real estate.

I have strong experience in test automation using Java, Spring, REST Assured, and Cucumber for backend APIs, and with JavaScript, Cypress, and Cucumber for frontend testing. I'm familiar with agile methodologies like Scrum and Kanban and have worked with tools such as Jira, Zephyr, Jenkins, Elastic, Couchbase, Kafka, AWS, and Git. I also have experience in web development with PHP, JavaScript, HTML, CSS, and MySQL.

Throughout my career, I've worked as a QA lead and IT teacher. I consider myself a committed and proactive professional who works well in teams and meets deadlines. I'm always seeking to improve, learn new skills, and take on challenges that push me to grow.

📁 Experience

QA Lead

Matera

February 2022 - present

MATERA

Responsible for ensuring software quality for REST API backends and frontend web applications in the accounting and finance sector. Led a QA team directly, managing tasks and promoting best practices. Developed automated tests for REST APIs using Java, Spring, REST Assured, and Cucumber. Performed functional, acceptance, reliability, system, integration, usability, regression, security, and performance testing using tools like JMeter and Postman. Worked with MySQL and H2 databases. Applied agile methodologies such as Scrum and Kanban, and used platforms like Jira, Zephyr, Jenkins, AWS, and Git. Additionally, developed tools and scripts in PHP to support the QA process and created documentation for clients.

Software QA Engineer

Kindred

January 2020 - February 2022

kindred

Responsible for software quality assurance across multiple backend APIs and frontend web applications in the betting and gambling industry. Developed automated tests for both web interfaces and APIs using JavaScript, Cypress, Cucumber, and Supertest. Performed various types of testing, including functional, acceptance, reliability, system, integration, usability, regression, security, and mobile testing on iOS and Android platforms. Worked with both SQL and NoSQL databases. Applied agile methodologies such as Scrum and Kanban, and used tools and technologies like Jira, Zephyr, BrowserStack, Elastic, Couchbase, Kafka, and Git. Also responsible for creating and delivering training sessions for users, traders, and clients.

Software QA Engineer

Thomson Reuters

July 2012 - January 2020

Responsible for software quality assurance for multiple applications in the accounting and real estate sectors. In charge of creating, preparing, and executing test scripts and test cases, as well as using SQL for database queries and validations. Performed both white-box and black-box testing, working with Sybase SQL Anywhere 9 and 16 databases. Also responsible for creating and delivering presentations for users and clients, conducting web application testing, and using various test automation and performance tools.

IT Teacher

Government of Santa Catarina

February 2016 - December 2016 and August 2011 - June 2012

Responsible for teaching computer classes to young students in state schools, using both Windows and Linux environments. Also supported teachers and staff in the use of electronic devices, including computers and related equipment.

Education

Degree in Computer Education

Universidade do Estado de Santa Catarina - UDESC

August 2017 - August 2021

Graduate Degree Technologies for Web Applications

Universidade Norte do Paraná - UNOPAR

August 2014 - August 2015

Bachelor's Degree in Computer Science

Universidade do Extremo Sul Catarinense - UNESC

February 2010 - July 2014
